PURIST-T2
R2P-F-R-T
NON-I/C ROUND
TRIMMED HOUSING

This product must be installed in accordance with the applicable code by a person familiar with the construction and operation of the product and the hazards involved. Read all of these instructions before installing.

WARNING: Rated for non-insulated ceilings only (non IC rated)
WARNING: Disconnect power prior to servicing or installing.

①

Slide hanging bars onto housing base plate.

②

Line up bottom edge of hanging bars with bottom of wood joist and hammer in tabs. Nail or screw hanging bars into place.

③

Position trim hole to desired location by sliding baseplate.

④

To hold housing in place, bend tab with pliers into hanging bar.

⑤

Mark approximate fixture location in ceiling.

⑥

Cut open using baseplate hole as your guide. **Except Trimless wood baseplate (R2P-F-R-TLW). Hole size is different than baseplate.**
Trimmed: 2-5/8" DIA. [66.7mm]

Trimless: 2-7/8" DIA. [73mm]

⑦

Caution: Careful attention should be made to cut within the hole diameter for the best fit.
Pull electrical wire through newly cutout hole.

NON-I/C ROUND
TRIMLESS HOUSING

This product must be installed in accordance with the applicable code by a person familiar with the construction and operation of the product and the hazards involved. Read all of these instructions before installing.
WARNING: Rated for non-insulated ceilings only (non IC rated)
WARNING: Disconnect power prior to servicing or installing.

❶

See R2P-F-R-T for baseplate mounting (steps 1-7). After drywall is cutout, cut notches to expose mounting holes on housing baseplate and install trimless frame with screws provided.

❷

Apply factory supplied fibre mesh over trim collar edge. Insert cardboard cover into opening

❸

Apply thin coat of plaster mud onto trim collar and fibre mesh, using collar lip as the height guide. For best results feather mud 12" from edge of lip

❹

Remove cardboard cover. Use a small screwdriver to clean the inside lip of the trim collar of any excess drywall mud

❺

Paint ceiling. Excess paint on inside edge of ring may restrict the trim from sitting flat

❻

Connector hangs through hole until completion. Mate connectors.

WARNING: Rated for non-insulated ceilings only (non IC rated)
WARNING: Disconnect power prior to servicing or installing.

1

See R2P-F-R-T for baseplate mounting (steps 1-4). Use provided machine screws to assemble extension arms to adapter ring.
2

Place trim ring assembly inside of baseplate. Utilize slots on extension arms which fit best with wood thickness. Assemble with provided hex machine screws to hold in place.

3

Install wood ceiling. Hole size **3-1/32" to 3-1/16"** Diameter. Can use adapter ring as template. **Do not use baseplate as hole template.**

4

Adjust transition ring height by loosening the 2 hex machine screws to make ring recess by 1/16". Trim will be flush with ceiling once installed.

5

Connector hangs through hole until completion. Insert mating connector from trim and install trim into ceiling.

## Wiring Instructions (RT) Remote

Caution: Ensure Driver is switched **OFF** before connecting LED. Failure to do so will cause **IMMEDIATE LED FAILURE**.

CAUTION TO INSTALLER: This LED device is polarity sensitive and must be wired in series. Mating connectors can only be wired in series, factory made jumper with connectors available if necessary.
Wiring must be connected as noted in diagrams below. Failure to follow instruction provided will result in damage to luminaire.

♦ Rated for non-insulated ceilings only
♦ Certified as stand alone luminaire
♦ For use with approved LED Drivers, refer to LED driver specification sheets for compatibility and dimming
